

CZECH ROCKET CHALLENGE 2025

ready for liftoff?

Join the competition and experience the work of real
rocket engineers!

MISSION: WHAT IS CRC?

Czech Rocket Challenge is a team competition designed for high school and college students who want to gain practical experience in the field of rocket science.

Your task will be to design, build and launch a rocket, which will not only be judged on the height reached, but also on the quality of the design, innovation and overall solution. You get the engine and the altimeter from us, **the rest is up to you!**

The entire competition process is supported by workshops and individual consultations. The manual will provide you with all the **necessary information, rules and technical specifications.**

This competition is not only about technical skills, but also about **creativity, teamwork and the courage to go beyond the ordinary.** The Czech Rocket Challenge is a great opportunity to combine theory with practice, innovate and create the future of Czech space.

Sign up and be a part of the fifth edition!
